PROFESSIONAL SUMMARY

- Senior iOS Engineer with 10+ years designing, building, and scaling production mobile applications across FinTech, IoT, healthcare, and e-commerce domains.
- Deep expertise in Swift, SwiftUI, UIKit, and modern mobile architecture (MVVM, Clean Architecture, modular design), with hands-on experience mentoring developers and driving technical decisions.
- Delivered enterprise mobile solutions spanning BLE and real-time communication, payment integrations, biometric authentication, and performance-critical workflows — owning the complete App Store release lifecycle.
- Recently completed an Integrated AI program at SAIT (Calgary), working at the intersection of iOS and on-device AI/ML, and applying Swift 6 concurrency and AI-assisted development to build maintainable, scalable apps.

CORE COMPETENCIES

Mobile Development: Swift · SwiftUI · UIKit · Objective-C · Combine · Swift Concurrency (async/await, actors, Sendable, structured concurrency) · Swift 6 · Core Data

Architecture & Design: MVVM · Clean Architecture · Modular Architecture · Feature Modularisation · Dependency Injection · Protocol-Oriented Programming · SOLID · Design Patterns

Quality & Performance: XCTest · XCUITest · Swift Testing · Unit & UI Testing · Code Reviews · Performance Optimisation · Memory Management · Instruments · Accessibility (VoiceOver, Dynamic Type)

CI/CD & Release: Xcode Cloud · Fastlane · TestFlight · App Store Connect · Git · Swift Package Manager

Security & Auth: Face ID / Touch ID · LocalAuthentication · Keychain Services · CommonCrypto · App Transport Security · OAuth 2.0 / JWT

Networking & Integration: REST APIs · GraphQL · WebSockets · Firebase · BLE / CoreBluetooth · Third-Party SDKs

Cross-Platform: Flutter (working knowledge)

Leadership & Collaboration: Technical Leadership · Mentorship · Cross-Functional Collaboration · Stakeholder Communication · Agile / Scrum · JIRA

PROFESSIONAL EXPERIENCE

Tech Mahindra · Enterprise Mobile Solutions, Aug 2022 – Aug 2024

Senior Mobile Developer

- Delivered production iOS applications in Swift, SwiftUI, MVVM, and Clean Architecture, driving technical design decisions and ensuring scalable, maintainable codebases across multiple enterprise client products.
- Owned the full App Store delivery lifecycle — certificate management, signing, provisioning, and coordinated releases across multiple build environments.
- Integrated third-party SDKs and RESTful APIs, including payment gateways and real-time data feeds, ensuring secure, reliable, and performant data flows in production.
- Mentored iOS engineers and established coding standards and code-review practices that reduced technical debt and improved consistency across multiple codebases.
- Leveraged AI-assisted development workflows (Claude Code / Cursor) to accelerate refactoring, debugging, and automated test generation, with mandatory human review.

Volansys Technologies · IoT, Hardware & Healthcare, Sep 2017 – Aug 2022

iOS Engineer

- Architected and delivered three production iOS applications from a single shared Swift codebase, using a modular, multi-target architecture that enabled significant code reuse.
- Designed data-flow architecture across networking, persistence, and presentation layers using REST and WebSocket transports, Codable models, and reactive Combine pipelines with retry/reconnection and background-state handling.

- Built BLE and Wi-Fi communication layers for IoT hardware, engineering custom protocol handling and reconnection logic for field-deployed sensor systems.
- Implemented security-critical features including LocalAuthentication (Face ID / Touch ID), Keychain-backed credential storage, and encryption integrations in regulated production apps.
- Led performance profiling with Instruments and the Memory Graph Debugger, resolving leaks, retain cycles, and CPU bottlenecks; added deinit-level memory checks to CI to prevent regressions.
- Owned signing infrastructure, provisioning, and App Store submission across a portfolio of products with zero release-blocking credential failures.

Openxcell Technolabs · Mobile Product Studio, May 2013 – Aug 2017

iOS Developer

- Built and shipped multiple iOS applications in Swift and Objective-C across consumer and SMB products, developing deep fluency in memory management, the app lifecycle, Auto Layout, and the Xcode toolchain.
- Contributed to migrating legacy Objective-C codebases to Swift, improving type safety, readability, and long-term maintainability.
- Delivered highly interactive UIs with Core Animation and MapKit, applying performance-conscious design for smooth, responsive experiences.
- Collaborated within cross-functional product teams through code reviews and Agile delivery, and developed systematic root-cause analysis practices for complex crashes and memory issues.

SELECTED PROJECTS

iStocks — Watchlist & Trading Companion

Swift · SwiftUI · Combine · async/await · Swift 6 · MVVM · REST/JSON · XCTest

SwiftUI-first iOS app with real-time price updates and Combine-driven reactive data flows, demonstrating modern SwiftUI architecture and a testable MVVM + Clean Architecture design consuming REST/JSON endpoints with Codable models. Includes a Swift 6 strict-concurrency module (actors / Sendable). Open-source on GitHub.

Smart Garage Door Opener — IoT Platform

Swift · WebSockets · Combine · Core Location · Multithreading · Azure

Three iOS apps from a single shared codebase with real-time device communication, location-aware automation, and Azure cloud integration — production proof of modular, multi-target architecture.

E-Commerce iOS Application

SwiftUI · REST APIs · Payment Gateway · Magento · Third-Party SDKs

Full-featured commerce platform with Magento backend, payment-gateway integration, real-time inventory feeds, and secure transactions.

EDUCATION

Integrated Artificial Intelligence — SAIT, Calgary, AB, Sep 2025 – Apr 2026

Project Management Certificate — MacEwan University, Edmonton, AB, Sep 2024 – Aug 2025

B.Tech, Information Technology — Dharmsinh Desai University, India, Aug 2010 – May 2013

Diploma, Information Technology — BBIT, India, Aug 2007 – Jul 2010
